

STUDENT HEALTH PROGRAMME

Student Health Programme is a unique outreach programme for early childhood care. The children are most vulnerable to morbidity such as Malnutrition, Worm Infestation, Skin, Eye and Dental diseases. Student Health Programme covers students from Primary level to Higher Secondary level only.

A well planned and executed student health programme provides complete health care and identifies the congenital defects, Eye defects, Dental defects, Worm infestations, Anaemia, Vitamin Deficiencies and Major Physical defects. After detailed medical examination prompt references are made to the specialist for rectification and providing a proper health care at the earliest stages. Medicines were supplied to all students who need treatment.

Health cards were issued to all government school students in the UT of Puducherry

First Aid kits were supplied to all Govt. schools.

Medical Fitness certificate issued to all school students for higher studies in Puducherry region.

Sanitary certificates were issued to all Private Educational Institutions in Puducherry region.

Health Education is imparted to all Government school students.
